WHO WE ARE

Sky Horizon SES is a specialized provider of seismic field operations, oilfield equipment solutions, seismic equipment trading, technical consultancy, maintenance services, and advanced geophysical data processing across the Middle East, North Africa, and international markets.

Sky Horizon SES is a specialized provider of seismic field operations, oilfield equipment solutions, seismic equipment trading, technical consultancy, maintenance services, and advanced geophysical data processing across the Middle East, North Africa, and international market

MISSION

To provide innovative, reliable, and cost-effective seismic and oilfield solutions that maximize operational performance and project success.

VISION

To become the preferred regional partner for integrated seismic operations, geophysical services, and oilfield equipment solutions.

SEISMIC SERVICES

SEISMIC FIELD OPERATIONS

- Vibrioses Operations
- Seismic Acquisition Support
- Field Quality Control (QC)
- Crew Management
- Project Mobilization
- Equipment Commissioning
- Operational Consultancy

SEISMIC DATA PROCESSING & IMAGING

- 2D Seismic Data Processing
- 3D Seismic Data Processing
- Seismic Reprocessing
- Land Noise Attenuation
- Geometry Reconstruction
- Static Corrections
- Imaging Support
- Velocity Analysis
- Migration Support
- Signal Enhancement
- Data Conditioning
- Final QC & Deliverables

OILFIELD EQUIPMENT SOLUTIONS

- Oilfield Equipment Supply
- Equipment Rental
- Spare Parts Supply
- Maintenance Services
- Technical Support
- Equipment Inspection
- Skilled Operators & Technical Crew Supply

SEISMIC EQUIPMENT TRADING & MARKETING

- Buying, Selling & Leasing Seismic Equipment
- International Marketing of New & Used Equipment
- Equipment Sourcing
- Manufacturer Representation in the MENA Region
- Regional Distribution Partnerships
- Commercial Brokerage

MAINTENANCE & TECHNICAL CONSULTANCY

- Preventive Maintenance
- Corrective Maintenance
- Hydraulic & Electrical Support
- Fleet Audits
- Technical Training
- Project Evaluation

SEISMIC TRAINING

- Seismic Data Processing
- Seismic Data Interpretation
- Seismic Attribute Analysis
- Petrophysical Analysis
- Reservoir Characterization
- Well Logging
- Gravity & Magnetic Methods
- Professional Software Training.

OUR KEY CAPABILITIES

LAND SEISMIC & OILFIELD EQUIPMENT

Sky Horizon SES provides flexible equipment solutions to support land seismic acquisition, exploration, and oilfield operations.

- Sky Horizon SES provides flexible equipment solutions to support
- Equipment Rental & Long-Term Leasing
- Equipment Sales & Procurement
- Equipment Partnership & Joint Project Participation
- Seismic Vibrators & Vibroseis Systems
- Wireless Seismic Nodes & Acquisition Systems
- Geophones, Sensors & Field Accessories
- Oilfield & Field Support Equipment
- Spare Parts, Consumables & Technical Support
- Equipment Inspection, Maintenance & Mobilization Support

SEISMIC DATA PROCESSING & REPROCESSING

We provide professional seismic data processing and reprocessing solutions designed to improve data quality, enhance subsurface imaging, and maximize the value of existing seismic datasets.

- 2D & 3D Seismic Data Processing
- Seismic Data Reprocessing
- Noise Attenuation & Signal Enhancement
- Static Corrections & Velocity Analysis
- Deconvolution & Multiple Attenuation
- NMO / DMO Processing
- Pre-Stack Time Migration (PSTM)
- Post-Stack Processing & Migration
- Spectral Balancing & SEG-Y Quality Control

SEISMIC OPERATIONS & TECHNICAL SUPPORT

Our technical capabilities support seismic contractors and exploration teams throughout equipment preparation, mobilization, acquisition, and field operations.

- Vibroseis Operations & Quality Control
- Vibrator Acceptance Testing
- Equipment Inspection & Readiness Assessment
- Project Start-Up & Mobilization Support
- Field Technical Support & Troubleshooting
- Seismic Equipment & Crew Support

PROFESSIONAL GEOSCIENCE & TECHNICAL TRAINING

Sky Horizon SES delivers practical, industry-focused training programs designed for geoscientists, engineers, field personnel, and technical teams.

OUR TRAINING CAPABILITIES INCLUDE:

- Seismic Data Processing & Reprocessing
- Seismic Data Interpretation
- Seismic Attribute Analysis
- Petrophysical Analysis
- Reservoir Characterization
- Vibroseis Operations & QC
- Land Seismic Acquisition Fundamentals
- Professional Geoscience Software Training
- Customized Corporate & Project-Based Training

STRATEGIC PARTNERSHIPS & JOINT PROJECTS

Beyond conventional equipment supply, Sky Horizon SES is open to strategic partnerships and joint project participation.

We combine our equipment resources, technical capabilities, industry expertise, and flexible commercial approach to support seismic contractors, oil & gas operators, geophysical companies, and project partners in upcoming exploration and field operations.

Our partnership models may include equipment contribution, rental and leasing arrangements, technical support, training, procurement support, and joint participation in suitable projects.
